## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/19/2008 has been entered.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: Regarding claim 1, the prior art of record, Wynbeek (US 2003/0032422) teaches providing a first wireless communications link 208 and 228 (Fig. 2, Ultra Wideband); providing a second wireless communications link 207 and 223 (Fig. 2, carrier wave); wherein the first wireless communications link is a ultra wideband transmission link for transmitting payload data (Sections 0017 and 0022) and the second wireless communications link is a different type of wireless communications link (Section 0015, carrier wave).

Sudo (US 7,269,774) teaches a link for communicating error control data 121 (Fig. 1 and Col. 2 lines 15-27) without communicating payload data (Sudo is silent about communicating payload data which for communicating error control data (Col. 4 line 26-Col. 7 line 11) there should be no payload data and therefore Sudo reads on the claim limitation).

Batra teaches an ultra wideband transmission link for transmitting payload data (Section 0022).

The prior art of record fails to teach a method, comprising providing a first wireless communications link; providing a second wireless communications link; wherein the first wireless communications link is a ultra wideband transmission link for transmitting payload data, and the second wireless communications link is a different type of wireless communications link for communication error control data for the ultra wideband transmission link without communicating payload data.

Wynbeek, Sudo, and Batra teach the claimed limitations, however, the examiner believes that one of ordinary skill in the art would not be motivated to combine these references together.

Further, remarks filed on 10/1/2007 further states reasons for allowance.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 1-13, 32, and 44.

Regarding claim 14, Wynbeek teaches a first communications module for performing wireless communications via a first communications link 208 and 228 (Fig. 2, Ultra Wideband); second communications module for performing wireless communications via a second communications link 207 and 223 (Fig. 2, carrier wave); wherein the first wireless communications link is a ultra wideband transmission link for communicating data at very high data transfer rates (Sections 0017 and 0022) and the second wireless communications link is a different type of wireless communications link (Section 0015, carrier wave).

Sudo teaches a link for communicating error control data 121 (Fig. 1 and Col. 2 lines 15-27) without communicating payload data (Sudo is silent about communicating payload data which for communicating error control data (Col. 4 line 26-Col. 7 line 11) there should be no payload data and therefore Sudo reads on the claim limitation).

Batra teaches a UWB transmission link for transmitting payload data (Section 0022).

The prior art of record fails to teach a system comprising first communications module for performing wireless communications via a first communications link; second communications module for performing wireless communications via a second communications link; wherein the first wireless communications link is a ultra wideband transmission link for communicating data at very high data transfer rates and the second wireless communications link is a different type of wireless communications link for communicating error control data for the ultra wideband transmission link without communicating payload data.

Wynbeek, Sudo, and Batra teach the claimed limitations, however, the examiner believes that one of ordinary skill in the art would not be motivated to combine these references together.

Further, remarks filed on 10/1/2007 further states reasons for allowance.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 14-24, 33, 45, and 52.

Regarding claim 25, system claim 25 is allowed for the same reason as claims 1 and 14 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 25, 34, and 46.

Regarding claim 26, method claim 26 is allowed for the same reason as claims 1 and 14 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 26, 35, and 47.

Regarding claim 27, method claim 27 is allowed for the same reason as claims 1 and 14 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 27-31, 36, and 48.

Regarding claim 37, apparatus claim 37 is allowed for the same reason as claims 1 and 14 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 37-41 and 49.

Regarding claim 42, apparatus claim 42 is allowed for the same reason as claims 1 and 14 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 42 and 50.

Regarding claim 43, apparatus claim 43 is allowed for the same reason as claims 1 and 14 since the recited elements would perform the claimed steps.

The prior art of record fails to teach the claimed subject matter as claimed and substantially connected in claims 43 and 51.
